This item analysis is based on 200 answer sheets returned to the union for the main 2/20/10 analyst exam session. We did not receive sufficient numbers of answer sheets to do an item analysis for either the Friday or Sunday sessions. Where the most popular answer accounted for 50.1% or more of the total answers, that answer is highlighted. Where no answer accounted for 50.1% or more of the total answers, the highest two (or three) answers are highlighted and the question number in the left hand column is white not gray. These may be especially suitable for protest since there was no majority answer. The best information we have is that those taking one level of test (Staff or Assoc. Staff Analyst) completed either questions 1-60 and 81-100 or questions 1-80. Those taking two levels (Staff and Assoc. Staff Analyst) completed all 100 questions. Compare your answer sheet to the item analysis and the preliminary answer key when DCAS publishes it to see how you did and to determine which questions might be worth protesting. A question in which a majority in the item analysis picked the same answer as DCAS, but you did not is probably a less fruitful question to protest than one in which there was no majority answer.
